### DETAILED ACTION

This Office action is in response to the amendment filed June 20, 2003 and the IDS received August 4, 2003.

1. The rejection under 35 U.S.C. 103(a) as unpatentable over KONDO is **withdrawn** in view of the amendment which more specifically defined the radical-polymerizing compound.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-24 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by KAWAMURA et al.

The claimed invention is now drawn to a negative image-recording material for heat-mode exposure, the material comprising (A) an IR absorber; (B) a radical generator having an onium salt structure; (C) a radical-polymerizing compound and (D) a reducing additive, the material being recordable by exposure with IR radiation, wherein the radical-polymerizing compound is selected from the group consisting of an unsaturated carboxylic acid, an ester of an unsaturated carboxylic acid, and an amide of an unsaturated carboxylic acid.

NAKAMURA et al anticipates the claimed invention at Examples 11 and 12 wherein the photosensitive layer comprises an iodonium salt, an infrared absorber, a hexaacrylate and a 1-

methoxy-2-propanol among other ingredients. The solvent 1-methoxy-2-propanol meets the claimed reducing additive component, thus claims 1-17 and 22-24.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
